Body:

In order to achieve your goal, you should have a clear image of your **strengths** and **weaknesses** across your **internal business system**. Without knowing your strengths and weaknesses, you will never fulfill your full potential.

Our Decisions & Organization Diagnostic services are designed around a structured approach enabling our experienced consultants to work closely with you in identifying these weaknesses. For this purpose, we have developed specialized **diagnostic tools** based on leading practices and optimal performance benchmarks. These tools enable us to assess your organizational performance across your value chain functions as well as support functions resulting in the rapid identification of your major weaknesses compared to traditional consulting approaches.

As we are currently living in business environment marked with limited resources, we will use your strengths and weaknesses to build up specially designed **prioritization model**. The model will typically built up around understanding the costs, benefits and risks associated with initiatives. This model will assist you building up a structured roadmap that will guide you through your transformation efforts.
